This involves carrying out six calculations that show the difference between the average earnings of men and women in our organisation. It does not											
involve publishing individual employee's data. We are required to publish the results on our own website and a government website. The six calculations											
are: mean gender pay gap; median gender pay gap; mean bonus gender pay gap; median bonus gender pay gap; proportion of males and females receiving											
a bonus payment; and proportion of males and females in each quartile band.											
We can use these results to assess:											
* the loyals of gondar aquality in our workplace											
 * the levels of gender equality in our workplace * the balance of male and female employees at different levels 											
* how effectively talent is being maximised and rewarded											
Gender Pay Reporting requires our organisation to make calculations based on employee gender. We have established this by using our existing payroll											
records.											
The results of the statutory calculations are listed above.
